Cautionary Note Regarding Forward-Looking Information

This presentation contains statements that, to the extent that they are not historical fact, may constitute “forward-looking information” within the meaning of applicable securities legislation. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always using words or phrases such as “may”, “would”, “could”, “will”, “likely”, “expect”, “anticipate”, “believe”, “intend”, “plan”, “forecast”, “project”, “estimate”, “propose”, “outlook”, and or the negative of those words or other similar or comparable words, or stating that certain actions, events or results may, could, would, might or will occur or be taken or achieved) are not statements of historical fact and may be forward-looking information. Forward-looking information in this presentation includes, but is not limited to, information concerning the plans and objectives of management for future exploration and operations on the Company’s projects; timing, type and amount of future exploration activities; results of future exploration and operations, including any drilling and sampling results; advancement of the Company’s projects; declaration of a mineral resource estimate in the future; potential expansion of mineralization; work plans and exploration programs to be conducted; and any other information contained herein that is not a statement of historical fact. Forward-looking information is based on management’s reasonable estimates, expectations, analyses and opinions at the date the information is provided and is based on a number of assumptions and subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking information. Assumptions upon which such forward-looking information are based include, without limitation, that all required shareholder, regulatory and third-party consents will be obtained; no significant event occurring outside the ordinary course of business; the legislative and regulatory environment; international conflict; impact of increasing competition; current technological trends; price of minerals, including gold; costs of exploration and development; anticipated results of exploration and development; the effects of past and future pandemics; the ability to operate in a safe and effective manner; and the ability to obtain financing on reasonable terms. Readers are cautioned that the foregoing list is not exhaustive. The Company’s actual results, programs and financial position could differ materially from those anticipated in such forward-looking information as a result of numerous factors, risks and uncertainties, many of which are beyond the Company’s control. These include, but are not limited to, delays in obtaining any required shareholder, governmental and regulatory approvals; legislative changes that impact mining operations in which the Company conducts business; results of exploration activities and development of mineral properties; interpretation of drilling results and other geological data; uncertainties of mineral resource estimations; receipt and security of mineral property titles; changes in project parameters; possible variations of mineral grade or recovery rates; failure of equipment or processes to operate as anticipated; accidents; labour disputes; the inability to obtain key personnel and parts related to operations; receipt of licenses to conduct mining activities; liabilities and risks, including environmental liabilities and risks inherent in the development of the Company’s projects; cost overruns or unanticipated costs and expenses; the availability of funds; fluctuations in metal prices; currency fluctuations; macro-economic market trends, increases in inflation, general market and industry conditions; competition; and war. There is no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Accordingly, readers should not place undue reliance on this information. The Company does not undertake to update any forward-looking information, except as, and to the extent required by, applicable securities laws.

About

Yukon Metals represents a property portfolio built on over 30 years of prospecting by the **Berdahl family**, the prospecting team behind Snowline Gold's portfolio of primary gold assets.

The Yukon Metals project portfolio provides exposure to **copper, gold, silver** and **critical metals**.

The Company is led by an experienced Management team and Board of Directors with technical, financial and Yukon expertise.

Key Property Details:

HIGHLIGHTS:

- The YMC portfolio holds **17 projects** covering a total land package of approx. **43,000 hectares** in the temperate zone of the Yukon.

- 2025 high-priority drill targets:**

Birch - Cu, Au

AZ - Cu, Au

Star River - Au, Ag, Cu

- YMC is also conducting generative exploration across its broader portfolio to **develop the next pipeline of discovery opportunities** in the highly prospective Yukon Territory.

PROPERTY DETAILS:

BIRCH

METALS

Cu – Au

OVERVIEW

Opportunity

- High-grade copper-gold in soil anomaly up to **0.99 g/t Au across 1400m**.
- Rock chip sampling with values up to **2.42% Cu** and **14.1 g/t Au**.
- Strong geophysical anomalies align with high-grade gold and copper in soils.

Ownership & Scale:

- YMC owns 100% of the 7,000-hectare property.
- Previously owned by Ryan Gold who approached the property as an epithermal gold target.

Location:

- 65km northeast of Burwash landing.

Permitting:

- Ongoing First Nations Consultation.
- Class 3 Permit: *In progress*.

BIRCH

HIGH PRIORITY DRILL TARGETS

COPPER-IN-SOILS AT BIRCH 50M X 100M GRID.

MOLYBDENUM-IN-SOILS AT BIRCH 50M X 100M GRID.

MINERALIZED SKARN HORIZON GRADING
14.1 G/T AU AND 0.43% CU.

MINERALIZED SKARN GRADING
2.42% CU, 0.94 G/T AU AND 42.1 G/T AG.

BIRCH

HIGH PRIORITY DRILL TARGETS

EXPLORATION PROCESS:

1

High-grade Cu, Au and Mo discovered in soils.

2

Strong 1400m long copper-gold soil anomaly including up to **0.99 g/t Au**.

3

Geochemistry, geophysics and rocks point to intact porphyry potential. IP survey highlights conductive zones.

CROSS SECTION VIEW OF HOLE BR25-001 WITH COPPER EQUIVALENT AND GEOLOGIC INTERPRETATION.

2025 DRILL LOCATION MAP WITH OVERLAIN 2024 SOIL COPPER ANOMALY

PROPERTY DETAILS:

BIRCHMETALS **Cu – Au****INAUGURAL DRILL PROGRAM HIGHLIGHTS**

- A total of 1,685m of HQ diamond drill core in six holes off 4 pads has been completed down to depths of up to 400 metres with **all holes intersecting mineralized skarn horizons**; assay results are pending.
- Near surface mineralization beginning at ~25m, and interval widths up to 46m in drill core, includes a thick, **continuous interval of intensely skarn altered rock from 256.5 to 302.5 metres**.
- The mineralization style suggests the **potential for a large, multistage skarn system** developed along the marble–schist contacts and intrusive margins.

PROPERTY DETAILS:

BIRCH

METALS Cu – Au

HIGHLIGHTS : DRILL RESULTS HOLE 1

- The initial drill hole encountered **stacked skarn horizons containing copper mineralization over lengths of up to 21.2 meters**, including multiple intervals over **3.1% copper equivalent**.
- Drilling intersected skarn horizons **extending along a 750-meter strike east-west**.
- Prospecting 2km south of the drill pad returned up to **16g/t Au, 1,825 g/t Ag, and 0.43% Cu**, in surface rock samples from an area coincident with a large molybdenum soil geochemical anomaly.

HOLE BR25-001 AT 149M: CLOSE-UP OF MASSIVE PYRRHOTITE > CHALCOPYRITE WITHIN SKARN HORIZON GRADING 2.7% CU AND 0.55% AU.

HIGHLIGHTED DRILL HOLE ASSAY INTERVALS*

Hole ID	From_m	To_m	Length_m	Cu %	Au g/t	Ag g/t	CuEq_%*
BR25-001	138.8	160.0	21.2	0.30	0.08	3.81	0.41
and incl	145.5	146.0	0.6	2.50	0.55	18.5	3.20
incl	150.0	160.0	10.0	0.39	0.10	5.76	0.53
and incl	150.0	151.0	1.0	2.70	0.55	24.1	3.45
and	283.0	283.9	0.9	0.00	1.50	0.25	1.43
and	285.4	286.0	0.6	0.45	0.45	5.20	0.93

Notes: True widths are not yet known but are estimated to be near true thickness based on current geological interpretation.*Copper equivalent (CuEq %) values have been calculated using the formula: $CuEq \% = Cu \% + (Au \text{ g/t} \times 0.95) + (Ag \text{ g/t} \times 0.0095)$, based on metal prices of US \$4.00/lb Cu, S \$3,000/oz Au, US \$40/oz Ag. Recovery factors of 92% copper, 80% gold, and 60% silver were assumed based on a review of similar projects. No metallurgical test work has yet been completed at Birch.

PROPERTY DETAILS:

BIRCHMETALS **Cu – Au****2025 EXPLORATION PROGRAM**

- New claims staked in October 2024 doubling the land package.
- 3000m diamond drill program.
- Testing and mapping porphyry indicators.

OPPORTUNITY AHEAD:

- **Hole 3:** 250-meter step-out to the east, encountered near-surface mineralization beginning at ~25 meters and a **46-meter-long thick, continuous interval of intensely skarn altered rock** from 256.5 to 302.5 meters.
- **Hole 4:** spaced 750m apart within the 1400m-long skarn trend located within a surface **high-grade gold anomaly** (0.99 g/t Au in soils).

PROPERTY DETAILS:

AZ**METALS****Cu – Au****OVERVIEW****Opportunity**

- High-grade copper discovered on surface over 1.2km zone.
- Multiple high-grade copper samples including **3.49% Cu**, **1.22% Cu** and **1.75% Cu**.
- Exposed polymetallic veins on surface.

Ownership & Scale:

- YMC owns 100% of the **13,110-hectare property**.

Location:

- **6km from the Alaska Highway.**
- Past producing alluvial gold creek nearby.*

Permitting:

- Class 1 Permit: Summer 2025.

*Placer Gold Mine in the Yukon.

AZ

HIGH PRIORITY DRILL TARGETS

EXPLORATION PROCESS:

1

Bright orange oxidized zones identified.

2

Prospecting teams found high-grade Cu on surface.

3

Large-scale 1.2km long Cu trend offers multiple targets.

4

Airborne geophysics, LiDAR and prospecting/ mapping.

3.49% Cu

Initial planned drill holes at Saddle, F2 and F3, in the southern portion of the Star River property, south of the all-access road.

Massive galena sample from F3 showing.

PROPERTY DETAILS:

STAR RIVER

METALS Au – Ag - Cu**INAGURAL DRILL PROGRAM HIGHLIGHTS**

- First drillholes intersected quartzite and dolostone with vein swarms containing pyrite, arsenopyrite, quartz, ankerite, and galena.
- Drilling is focused on a strong gravity anomaly coinciding with a TDEM conductor near the historic F2 and Canyon showings.
- Core photos presented in this release show vein textures and sulfide mineralization consistent with surface observations.

HNW Investor Tour – Star River Project

📍 *Whitehorse, Yukon*

- Site tour of Star River (Au – Ag – Cu)
- Core shack, investor presentations
- 30% of YMC shareholder base in attendance

Invested in the Yukon

Yukon-based and Local First Nation Contractors Engaged:

- Drill pad construction completed by Minconsult in partnership with **Vision Quest Drilling**, a Kluane First Nation citizen-owned company.
- Soil sampling services contracted to Vision Quest Drilling.
- Helicopter support provided by Yukon-based **Capital Helicopters**.
- Camp services are being delivered by **Kāganì**, a Kluane First Nation citizen-owned enterprise, in partnership with long-standing Yukon-based exploration contractor **Archer Cathro**.

Investment Highlights

High-Grade Exploration Potential

Top mining jurisdiction, with high-grade copper, gold and silver and exposure to critical metals.

Proven Leadership Team

Experienced Board and senior management team with technical, financial and Territory expertise.

Strong Financial Position

Well-funded with a disciplined approach to capital allocation and creating shareholder value.

District-Scale Opportunity

Large land package with district-scale potential, offering investors long-term upside.

Invested in the Yukon

Committed to sustainability, local partnerships, and responsible exploration.
